

Onkar Kulkarni

SENIOR FRONTEND DEVELOPER | REACT JS | REACT NATIVE | TYPESCRIPT

Pune, India

SUMMARY

Frontend Engineer with **5** years of experience building scalable, high-performance products across Web and Mobile (Android & iOS).

Specialized in **React.js**, **React Native**, and **TypeScript**, with strong expertise in **performance optimization**, **scalable architecture**, and **user-centric design**.

Experienced in delivering **production-grade applications for global users**, **driving feature ownership**, **performance optimization**, and **cross-functional collaboration**.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- **Frameworks:** React.js, React Native, Next.js, Redux
- **Backend & APIs:** Node.js, REST, GraphQL
- **Testing:** Jest
- **Tools:** Git, Jenkins, App Center, Jira, Figma, GitHub Copilot
- **Concepts:** Performance Optimization, Offline-first Architecture, CI/CD, Agile/Scrum

EXPERIENCE

Accenture | Mobile and Web Frontend Developer | 2021-Present

- Built and scaled **high-performance web and cross-platform mobile applications** using React.js, React Native, and TypeScript, improving **load time by ~25%** and overall responsiveness across key user flows.
- Owned **end-to-end feature development** — from requirement understanding to production release and post-release improvements.
- Designed **reusable and modular UI components** to improve maintainability and accelerate feature delivery.
- Implemented **offline-first architecture (WatermelonDB)** to support real-world usage scenarios with unstable connectivity.
- Integrated **Inflect (InfiViz) SDK** for image-based product recognition, enabling **data-driven and AI-assisted merchandising decisions**.
- Improved performance and scalability through **optimized rendering and efficient state management (Redux)**, **reducing UI lag**.
- Reduced **runtime errors/crashes by ~30%** using TypeScript and structured error handling.
- **Led onsite UAT and go-live activities (BGL, TGL, PGLS) for international clients**, ensuring successful deployments and production stabilization.
- Partnered with **client stakeholders during business visits** to understand operational workflows and translate insights into product improvements.

- Built features for **enterprise retail applications handling large product catalogs and real-world workflows.**
- Developed and maintained **unit tests using Jest** to improve code reliability and reduce regression issues.
- Leveraged **GitHub Copilot** to accelerate feature development and reduce repetitive coding efforts.

Spark Foundation | Intern | August 2020

- Built a full-stack credit management web application using HTML, JavaScript, PHP, and MySQL.

PROJECTS

E-commerce Web App (PWA) | React.js, Redux, Jest, SCSS, JavaScript

- Built a scalable PWA with optimized performance and API integration.
- Implemented Redux and Jest for state management and reliability.

E-commerce Android and iOS App | React Native, Redux, TypeScript

- Developed cross-platform Android and iOS applications with offline-first architecture (WatermelonDB).
- Integrated REST and GraphQL APIs and improved stability by reducing runtime errors through TypeScript adoption.

Loyalty Management System | Next.js, JavaScript, SCSS

- Built SEO-optimized dashboards for coupons and promotions.
- Improved performance through optimized API integration and rendering.

EDUCATION

- Bachelor of Computer Engineering (2021) | CGPA: 8.5/10

CERTIFICATIONS

- Microsoft Certified: Azure Security Engineer Associate
- Microsoft Certified: GitHub Actions

AWARDS

- ACE AWARD (2x), EXTRA MILE AWARD, GRO Star (Client Recognition)
